

AIR CONDITIONING SERVICING

Are your air conditioners ready for the QLD Summer Heat?

With the Queensland summer just around the corner, the last thing you want is to switch on the air conditioner only to find that it is not working as efficiently as it should be.

Your air conditioner should be blowing cool air to help beat the summer heat but when it's not regularly maintained, this may not be the case.

When your air conditioner sits idle for some time, it collects dust, dirt and debris, which affects its performance.

Regular maintenance and servicing (we suggest every 12 months) will prevent any unwanted delays and disruptions.

Some of the benefits of having your unit regularly serviced are:-

- Cheaper electricity bills
- Increased cooling and heating power
- Extends the life of your air conditioning unit
- Improvement to air quality by removing germs, mould and bacteria

For further information on any air conditioning issue, or to book in your Air Conditioning Maintenance Service - please contact us on 0410 135 670.
